

FOOD + INDUSTRIAL WORKPLACE DESIGN

ISG recognizes that efficient and modern facilities are key for food processing and manufacturing clients. Our multi-disciplinary professionals have delivered quality, focused design, planning, and construction phase services for food and industrial partners across the U.S.

ISG's expertise extends beyond the site, processing, and production spaces. With architecture, engineering, environmental, and planning experts, ISG provides comprehensive services to meet holistic corporate wellness and employee welfare goals. Quality spaces and carefully planned amenities help companies with employee attraction and retention, safety, and comfort—ultimately leading to workers that are happier and more productive.

Spaces + Amenities

Cafes + Food Service

Ability to have various food service amenities and seating options, cafe spaces are designed for occupancy throughout the work day.

Restroom + Shower Areas

Restrooms and shower areas provide privacy and are removed from general personal lockers to create efficient space use.

Specialty Areas

New perspectives, innovation, and growth are all benefits of a diverse and inclusive workplace. ISG has the familiarity and expertise to accommodate the space needs that support employee diversity and inclusion such as mothers' rooms and prayer spaces.

Employee Health + Well-Being

Employees Are Your Most Valuable Asset

When helping clients develop employee welfare spaces and amenities, ISG keeps the health and well being of employees at the forefront of design decisions. Best practices support the optimization of the following to minimize safety risks and maximize employee accessibility to personal protective equipment (PPE), restrooms, water, and other critical amenities:

- Air Quality
- Daylight + Views
- Layout
- Sound Control
- Temperature

\$4,000+
